

Commercial Portable HEPA Air Cleaner

HEPA 2000 UVIG

Built UV-C Light, Professional Water Damage Restoration for Air Scrubber | up to 2000 CFM / Stainless steel

Proven Performance

Superior purification performance

The HEPA 2000 UVIG Air Scrubber features built-in UV-C light technology, the perfect combination of UV disinfection function a two-stage filtration system that can quickly capture contaminant particles as small as 0.3 um, filter out most molds and viruses, and destroy 99.97% of the air at the source. Airborne pathogen structures inactivate viruses and kill microorganisms. It also cracks the most stubborn odor molecules, effectively improving air purification.

Safe and efficient, with stable structure

The entire machine is made of a one-piece stainless steel housing, which is strong and reliable, and also has some corrosion resistance. The control panel is, equipped with a marine circuit breaker and a differential pressure gauge. It keeps the machine running smoothly and reminds you to change the filter regularly to improve the operational performance of the air scrubber, making your operation safer and more efficient. In addition to the pre-filters, our scrubber use many filter materials. This combination allows you to use our filters as often as possible, reducing the cost of replacement.

High air volume and low noise

The HEPA 2000 UVIG air scrubber has a 3-stage wind speed control (800/1400/2000 CFM), covering a wide range up to 20000cu.ft. At the same time, the high-quality low noise motor helps us limit the noise to 70dBA and the ultra-quiet rollers that roll smoothly won't make you worry about noise. It's widely used to clean the ambient air in workplaces, enclosed spaces, mold, asbestos and lead remediation, commercial or factory buildings, medical facilities, etc.

Features

- ✓ ETL Listed
- ✓ Over 2,000 cfm on High Speed
- ✓ UV-C Light Disinfection
- ✓ The Mechanical Structure is Stable and Durable
- ✓ Filter Life Reminder
- ✓ 3-stage Filtration: Pre Filter HEPA/Activated Carbon-Filter
- ✓ Filter Change Light
- ✓ Ultra-quiet Bottom Pulley
- ✓ Power Cord Storage Function
- ✓ 23 ft AC cord with cord management
- ✓ Maintenance Free Bearing Motor
- ✓ Run Time Hour Meter

Key Features

In order to effectively help consumers solve problems in production and daily life, our products have the following characteristics:

- Large air volume, large use area
- The high filtration level (H13) has 99.97% filtration efficiency on 0.3um particles and can filter most molds and viruses.
- UV lamp sterilization
- UV light controllable switch
- Differential pressure gauge display
- Filter life reminder
- Ultra-quiet casters
- Can be connected to the air duct
- Various filters are available
- Three-speed variable wind speed filters are available
- Power cord storage
- The mechanical structure is stable and durable

Specifications

Power 7A (115V/60HZ)	Outlet 12 in.	Size For 2500 sq.ft / 20000 cu.ft
Airflow 800-2000 CFM	Weight 127.8 lbs	Dim(W x H x D) 34.8 x 27.2 x 26 in
Filtration System UV-C Light, Pre-filter and H13 High-efficiency clapboard filter		

Replacement Parts

- Pre-Filter
- H14 HEPA Efficiency Clapboard Filter
- F8 Medium Efficiency Filter
- H13 High-efficiency Clapboard Filter
- Activated Carbon Filter
- Paint Filter

NOTE: H14 HEPA Efficiency Clapboard Filter / Activated Carbon Filter / Paint Filter / F8 Medium Efficiency Filter Additional Purchase Required.

Application

The HEPA 2000 UVIG is a versatile variable speed HEPA air scrubber. With its stainless steel housing, ultra-quiet casters, and carrying handle, it's rugged and corrosion-resistant, and easy to transport anywhere. It's widely used in dust removal, asbestos abatement, etc.

The device has a built-in UV light that can effectively eliminate odors and pathogens. Therefore, it's also widely used for industrial air purification, mold control, dust and odor control, etc. At the same time, it can also help solve the problem of indoor, underground, and car air pollution caused by decoration or other reasons.

• Cleanroom

Clean rooms in hospitals, and laboratories. IVF fertility clinics, etc, need clean air to ensure no contamination.

• Office Use

If there are problems with air pollution or indoor air quality in your office. You can install some air purifiers in your office to clean the air.

• Mold Repair

These are very effective devices for filtering mold spores in indoor air. That's an essential part of most mold remediation we do here.

• Dusty Work Environment

The device effectively removes airborne particles, including allergens, indoor PM2.5, mold spores, and fine soot particles.

- + Hospital
- + Restoration Works
- + Confined Areas
- + Basement
- + Fire Departments
- + Industrial Cleaning
- + Construction Sites
- + Pollen Control
- + Odor Control
- + Dust Control
- + Tunnels
- + Grinding Works
- + Welding Booths
- + Sewage Remediation

The HEPA 2000 UVIG has a **1 years warranty.**
